Methodology

Returns are simple (non-compounded) from published daily settlements in the demo/backtest ledger. Each daily and monthly profit is applied to the original principal. Trade tickets are closed desk records with pair, direction, entry, exit and return percentage.

Growth of \$100 starts at 100 and accumulates simple daily profit from the selected period only. Period ending value = original \$100 + sum of daily profits in 2026-08-01 → 2026-08-05.
